

Fedconnect- Submitting Questions about Funding Opportunities

Investigators are permitted to submit technical questions about Funding Opportunities to Fedconnect. Because this requires an account, your Contract Administrator (CA) will submit the question through the ORAA account and respond to you with the answer.

In order to submit a question, please email your CA with the Reference Number/FOA identifier and Title of the Funding Opportunity along with the question you need to ask.

Your CA will be able to view previously submitted and answered questions. Your question will be entered into the Fedconnect portal. Keep in mind that the question and answer are public, and **should not contain proprietary information.**

Opportunity: Advanced Gasification: Improvements & Optimization

Description

Funding Opportunity Announcement titled "Advanced Gasification: Improvements in Existing Systems Availability, Novel CO2 Utilization Systems, and Low Rank Coal IGCC Optimization"

Overview

Reference number: DE-FOA-0000496
 Issue date: 03/15/2011
 Response due: 05/20/2011 08:00 PM ES

Set Aside:
 NAICS:
 PSC / FSC: 0000

Agency: DOE - DOE

Contracting office:

U.S. DOE/NETL
 Pittsburgh Campus
 626 Cochrans Mill Road
 PO Box 10940
 Pittsburgh, PA 15236-0940

Place of Performance:

Inbox

<input checked="" type="checkbox"/>	DOE - DOE	JANET M. SPAULDING	RE: Question - Project start date	04/07/2011 01:46 PM	YES	

ANSWER: Applicants should calculate the percentage of electrical energy of the total energy output as follows. At least 50% of the total energy output of the energy conversion system must be used to produce electrical energy. For example, in the case of a gasification-based system, the total energy output of the gasifier consists of the energy content of the syngas stream plus the energy content of the steam produced in the gasifier. At least 50% of the total energy output of the gasifier must be used to generate electricity.

Electricity means gross electricity produced by the project. Any electricity produced by the project that is also consumed by the project shall be considered to be electrical output.

QUESTION: On page 6 of the solicitation, the following statement is made:
 "For co-production concepts, ..., the power output must be greater than 50% of the total energy output of the plant." Can you please clarify with an example what this requirement
